Missouri River Basin User Forum: Drought Early Warning for the Lower Basin March 8-9, 2017 // Lied Lodge, Nebraska City, Nebraska

Objective: Assess current status of drought early warning in the Missouri River Basin and identify next steps to improve the system with a focus on the Lower Basin (below Gavins Point Dam).

Discussion topics:

- Current status of drought monitoring and prediction in the Basin
- Identify states, tribes, watersheds, and municipalities engaged in drought planning and how early warning information matches these efforts
- Identify opportunities to improve monitoring and forecasting, such as improving soil moisture data
