

FEMA

Climate Resilient Mitigation Activities

- In September 2015, FEMA announced the eligibility of three Climate Resilient Mitigation Activities (CRMA) for HMA
 - Aquifer Storage and Recovery (ASR)
 - Floodwater Diversion, Storage, and Recovery
 - Floodplain and Stream Restoration
- Provides guidance on drought mitigation as well as sustainable actions to mitigate other risks (e.g. flood, erosion)
- Encourages communities to incorporate climate resilience in all mitigation actions through use of green infrastructure methods and designing projects to increase ecosystem service benefits
- Eligible for all declarations after 9/30/15, and for FY 2016 PDM and FMA programs
