

“Adaptation Resources for Agriculture”

- Workbook for producers
- Uses a flexible, structured process to identify climate change impacts
- Provides farm-level adaptation tactics for improving responses to extreme and uncertain conditions.

AgBiz Logic & AgBiz Climate

- System to create and manage enterprise budgets
- Developed by Clark Seavert at Oregon State (support from USDA)
- AgBizClimate uses downscaled climate info to project yield and production changes over time
- Producers can adjust inputs, management, and technology adoption
