Monitoring & Forecasting

Better Subseasonal to Seasonal Forecasts;
Assessing NMME; Using EDDI
Webinars (current, upcoming and recap)
Websites: cnap.ucsd.edu;
ClimateEngine.org

Drought Impacts & Scenarios

Fallowed land
Drought Scenarios (RR & CA)
Adapting to highly variable precip climate

Communication & Outreach

Media Interviews/presentations
PPIC papers
Reliable Scientific Information
What goes into the Drought Monitor?
(supply, demand, evapotranspiration)

CA & NV Regional DEWS

Engaging Preparedness& Adaptation Communities

Workshops/trainings/meetings
Need assessment; small water systems
and tribal communities
Drought impacts on wildfire

Observations & Monitoring

Usability of data Soil moisture more, more more!

Drought Portal

How to transfer information/tools to the portal

Forecasting & Predictions

Better S2S More transparency Simplification of skill
